**Subject:** Quick Terwilliger Update - Sunday Afternoon

I'll try to be brief – but still a lot happening on the Fire and much more to come .. I was able to look at the whole fire today – kinda nice without all the Danger Tree service contracts working

- We have received roughly 1.5 inches of rain since the rain started Thursday evening – and it looks like at least that much more on the way through the week .. Overall – the roads look pretty good
- Roads, Equipment, Work (trees down, trees to haul, slash to haul)
  - o 415 road is about complete (equipment working) – still have a few trees to cut with trees and slash to haul .. The 416 road looks good with all the rain
  - o RD 19 north from 1985 (very little equipment working)– all trees down – a few trees to haul, and a fair amount of slash to haul
  - o RD 19 south from Cougar Crossing (equipment working) – most all trees down, a fair amount of trees to haul, and lots of slash to haul
  - o 500 Rd south - first mile (Most all our stuff is working here) – all trees down, a few logs to haul, and lots of slash to haul
  - o 500 Rd north – 5 miles (No Equipment) – locked the gate – the road is wet – do not travel on – done till spring – all trees down, all trees out, and most all slash hauled
  - o 100/140 Rd (most all equipment out) – all trees down, most all trees hauled, most the slash is piled and will stay in place .. Road looks ok – a few places to watch
  - o 1980 and 208 Rd (lots of equipment) – still lots of work to do .. Most all of Rose equipment working
- Will be transferring the ICT4 to David Duncan on Tuesday – he will shadow Randy Pyle tomorrow – David started getting familiar with the fire last week
